## **Changes made to the document based on Reviews**

The major reviews that were given to our document were about the grammar and flow of the topics. While we did our best even while we were writing our document, we could say that not everyone would have the same thought or difference in opinions and priorities which brought these. We still took into consideration on few of these as we have gone through the document again a couple of times reading it as a third man perspective. We have made all the required grammatical changes and made the document much more simpler and easier to read now. We have also moved the references from 3rd page to the 2nd page abiding to the rules that were given as a part of the Assignment. These were all the changes that were made and nothing to the content in the assignment. As a whole we would say that it was a great learning with the assignment.
